

# Modify or delete Python Part commands from the Allplan Actionbar

These functions are created in Allplan using the Npd mechanism (Nemtschek Plugin Definition File). The information is collected in the "C:\Data\Allplan\_XXX\Std\Plugins\PythonParts.npd" file. Attached are some screenshots that illustrate the connections.

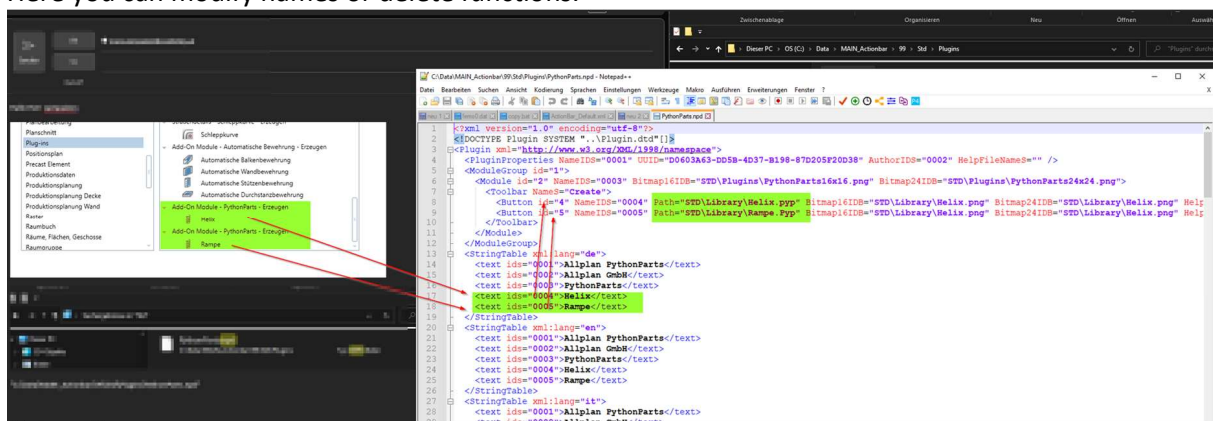

Searching the npd file:

In my example I found:

"C:\Data\MAIN\_Actionbar\99\Std\Plugins\PythonParts.npd"

Here you can modify names or delete functions.

After restarting Allplan.
